

**THE NATIONAL COLLEGE,
AUTONOMOUS BASAVANAGUDI,
BENGALURU-04**

DEPARTMENT OF ECONOMICS

Syllabus for
I and II Semester B.A. Economics
As per State Education Policy (SEP)
CHOICE BASED CREDIT SYSTEM

2024-25

BA-Economics Curriculum and Credit Framework for the Undergraduate Programme with three core subjects without practical's (Say A, B & C) in all three years OR three subjects in the first 2 years and choose one of them as Major in the 3rd year.

Se m.	Subject 1 Economics (Credits) (L+T+P)	Subject 2 (Credits) (L+T+P)	Subject 3 (Credits) (L+T+P)	Electives	Language s (Credits) (L+T+P)	Skill/ Compulsory Courses (Credits) (L+T+P).	Sports/NCC /NSS/Range &Rovers (Scouts & Guides).	To tal Cr ed its
I	DSC-E1: Micro economics (5)	DSC- B1(5),	DSC- C1(5),		L1-1(3), L2- 1(3)	Skill-1: Computer Applications (2) (1+0+2) / Environment al Studies (2)	Health, Wellness & Yoga (2) (1+0+2) (Optional)	26
II	DSC-E2: Macro Economics	DSC- B2(5),	DSC- C2(5),		L1-2(3), L2- 2(3)	Skill-2: Environ mental Studies (2)/ Computer Application s (2)	Sports/NCC/ N SS/R&R(S& G) (2) (0+0+4) (2) (Optional)	26
III	DSC-E3: Public Economics	DSC- B3(4),	DSC- C3(5),	Economics of GST (2) or Artificial intelligence and machine learning for Economics(2)	L1-3(3), L2- 3(3)	Skill-3: Communicati on & Translation Skills (2)(1+0+2)/ Constitution Values (2)		26
IV	DSC-E4: Development Economics	DSC- B4(5),	DSC- C4(5),	Entrepreneurial Economics (2) Or Economics of Start-Up (2)	L1-4(3), L2- 4(3)	Skill-4: Constitution Values (2)/Communi cation &Translation Skills (2) (1+0+2)		26
V	DSC-E5: Basic Quantitative Techniques/Int ernational Economics	DSC- B5(5),	DSC- C5(5),		Elective E1 (2+1)	Skill 5: Job Skills (2) (1+0+2)		23
VI	DSC-E6: Statistics for	DSC- B6(5)	DSC- C6(5)		Elective E2 (2+1)	Skill 6: Internship		23

	Economics Agricultural					(2) (0+0+4)		
	Economics							
	If candidates choose Economics as a major in the 3 rd year and study that subject only, then the curriculum and credit Framework will be as follows:							
V	DSC-E7: Basic Quantitative Techniques DSC-E8: Agricultural Economics	DSE-1:(3) Economics of GST DSE-2(3)- Economics of Marketin g DSE- 3(3) Economics and Law DS-E4: Rural Economics Res. Methodology (3)(2+0+2) (compulsory)		Skill 5: Job Skills (2) (1+0+2) Economics of tourism and Development Economics of dairy farming				23
VI	DSC-E9: Statistics for Economics DSC-E10: Indian Economics	DSE-E1 Economics of Insurance DSE-E2(2)- Economics of Marketing E4(3) Vocational- Digital Economics, Economics of dairy farming 1(3) (2+0+2)		Research Proposal formulation and Research Project (1*+ 4)				23
Students who complete the 3-year UG program with 3-subjects in the first 2-years/4-semesters, and one of the three subjects as major in the 3 rd year/ 5 th & 6 th Semesters will be awarded UG Degree in the major, with the other two subjects as minors.								

BA-ECONOMICS 1st SEMESTER

Program Name	BA in Economics	Semester	First Semester
Course Title	Micro Economics		
Course Code:	ECO-DSC-E1	No. of Credits	4+1=5
Contact hours	75 Hours	Duration of SEA/Exam	3 Hrs
Formative Assessment Marks	20	Summative Assessment Marks	80

Learning Outcomes (LOs): The Learning Outcomes of this course are as follows:

LO1: Apply the knowledge of the mechanics of supply and demand to explain working of markets.

LO2: Understand the choices made by a rational consumer. LO3: Explain relationships between production and costs.

LO4: Define key characteristics and consequences of different forms of markets

LO5: Understand the Concept of Cost and Revenue

LO6: Explain the theory of cost and production

LO7: Understand Market Structures and Factor Pricing

LO8: Understand Welfare Economics

MODULES	DESCRIPTION	75 Hours
Module I	Demand Analysis and Consumer Behavior	15
	Demand – Demand – Meaning. Elasticity of Demand – types, Measurement of Elasticity of demand – Total Expenditure method. Demand Forecasting – Meaning, objectives – importance – Techniques of demand forecasting – Survey & statistical methods – trend projection method (least square method) Consumer's Surplus – Importance and Limitations – Indifference Curve Analysis – meaning – properties – Consumer's Equilibrium – Concept of Consumer's Sovereignty – meaning.	
Practicum	Solve Simple problems on total expenditure method, Least square method & Trend Projection Method. Research and write an assignment on recent market trends where consumer preferences have significantly influenced production decisions.	
Module II	Concept of Cost and Revenue	15
	Cost – Economic Analysis – Concepts of cost – Fixed Cost – Variable cost – Total, Average & Marginal Costs – Short run and Long Run Cost Curves. - Distinction and relations between different cost curves and their analysis; U and L shapes of average cost curves; Revenue analysis-Concepts of revenues, Relation between AR & MR Curves, equilibrium analysis.	

Practicum	Solve problems and compare total cost, average cost, and marginal cost curves based on production data, Organize a debate or discussion on the relevance of traditional vs. modern theories of cost.	
Module III	Theory of Production and Costs	15
	Production – meaning, Production decisions; Production function; Iso-quant; Factor substitution; law of variable proportions; returns to scale; economies of scale; – Internal & External economies to scale traditional theory of cost (short run and long run); modern theory of cost.	
Practicum	Write an Assignment on Comparing the cost structures and production functions of different industries, Solve the problem sets with varying levels of difficulty, ranging from basic calculations to more complex scenarios involving multiple variables and Cost and Revenue Concepts	
Module IV	Markets structures and Factor Pricing	15
	Perfect competition: basic features, short run equilibrium of firm/industry, long run equilibrium of firm/industry, monopoly: basic features, short run equilibrium, long run equilibrium, price discrimination; monopolistic competition: basic features, , short run equilibrium, long run equilibrium, excess capacity; oligopoly kinked demand curve model, Marginal productivity theory of distribution; Wages and collective bargaining; Wage differentials; Rent — Scarcity rent; Differential rent; Quasi rent; Interest — Profits — Innovation, risk and uncertainty theories.	
Practicum	Conduct a case study to demonstrate the adjustment process to long-run equilibrium in a perfectly competitive market. Construct a cost and revenue schedule for a monopoly and determine its short-run profit-maximizing output and price.	
Module V	Welfare Economics	15
	Welfare Economics- meaning, problems in measuring welfare; Neo Classical welfare economics and consumer Surplus; Pareto's criteria; new welfare economics compensation principle, Kaldor- Hicks's welfare criterion- Bergson Samuelson social welfare function.	
Practicum	Use statistical data to compare welfare indicators (e.g., GDP per capita, income distribution) across different countries or regions, Group Discussions on Kaldor- Hicks's welfare criterion, social welfare function- Bergson Samuelson social welfare function.

II SEMESTER

BA–ECONOMICS
2nd SEMESTER

Program Name	BA in Economics	Semester	Second Semester
Course Title	Macro Economics		
Course Code:	ECO-DSC-E2	No. of Credits	4+1=5
Contact hours	75 Hours	Duration of SEA/Exam	3 Hrs
Formative Assessment Marks	20	Summative Assessment Marks	80

Learning Outcomes (LOs): The Learning Outcomes of this course are as follows:

LO1: Understand the Theories of National Income Accounting

LO2: The process of Consumption and Investment Functions

LO3: Concept of Multiplier and Inflation

LO4: Understand the determination of income and employment under Classical and Keynesian framework

LO5: Defining the IS-LM Analysis and Aggregate Demand

LO6: Understand the nature of Money, Interest and Monetary Policy

LO7: Define the concept of Inflation and Trade Cycle

MODULES	DESCRIPTION	75 Hrs
Module 1	Introduction and National Income accounting	15
	Nature of Macroeconomics and its significance, Indicators of Macro Economic Activity Stock and flow variables. Measurement of Macro Variables and Economic Performance: National Income Accounting - Important Concepts: GNP, GDP, NNP, NDP, NI, PI, DPI- Real GDP versus Nominal GDP- GDP deflator- Method of estimating National Income- Expenditure Method- Income Method-Value added or Net Product method- Difficulties in National Income Accounting- Trends in GDP in India -GNP and Quality of Life - Net Economic Welfare - Green Income.	
Practicum:	Calculate GDP using the expenditure method ($C + I + G + (X - M)$), Calculate Real GDP and Nominal GDP for a given year using price indices (e.g., GDP deflator, Consumer Price Index). Write an Assignment Providing examples of macroeconomic policies and their impact on unemployment, inflation, and economic growth. Debate on Green Income	
Module 2	Classical and Keynesian Macroeconomics	15
	Classical Theory: Introduction to classical theory of employment - Basic Assumptions of the Classical School- Say's law of Market- Determinants of Output, Employment, Savings, Investment, Wages, Prices, Interest Rate - Equilibrium Output and Employment-Implications of Classical Full-Employment Model-Critical Evaluation. Keynesian Macroeconomics: Aggregate Demand (AD) curve, Aggregate Supply (AS) curve, Sources of	

	shift in AD and AS, Principle of effective demand- Keynesian theory of output, income and employment- Equilibrium Income and Output in Simple Two Sector Model, Three Sector & Four Sector Models. Keynes Psychological law of consumption- Multiplier and Accelerator Analysis.	
Practicum:	Write an Assignment on comparing the classical theory of employment with Keynesian theory, highlighting their differences in terms of assumptions, policy implications, and views on the role of government. Write an assignment Illustrating the adjustment process to equilibrium using aggregate expenditure and income-expenditure approaches.	
Module 3	Money, Interest and Monetary Policy	15
	Meaning and nature of money, Primary and secondary functions of money; Quantity Theory of Money–Cambridge version, Classical theory of interest rate, Loanable fund Theory and Keynesian Theory of Liquidity Preference and interest rate, Liquidity Trap; Credit Creation and Money Multiplier Determination of money supply and demand; monetary base; tools of monetary policy.	
Practicum:	Conduct a debate on how changes in the money supply affect inflation and economic activity. Write an assignment on how central banks use these tools to achieve macroeconomic objectives such as price stability, full employment, and economic growth.	
Module 4	IS-LM Analysis and Aggregate Demand	15
	Goods market and money market, graphical derivations of the Hicks-Henson model (IS and LM functions); Properties of IS-LM curves, factors affecting the position and slope of IS-LM curves, determination of equilibrium income and interest rates; Studying the impact of fiscal and monetary policies using IS-LM framework;	
Practicum:	Solve for the intersection of the IS and LM curves to determine equilibrium income and interest rates. Group Discussions on Investigating historical events (e.g., financial crises, policy changes) and analyze their impacts using the IS-LM framework.	
Module 5	Inflation and Trade Cycle	15
	Inflation: meaning; demand and supply side factors; natural rate theory; monetary policy-output and inflation (monetarist view); Phillips curve: short run and long run Trade Cycle: Nature and characteristics; Hawtrey's monetary theory; Hayek's over-investment theory; Keynes' view on trade cycle; Control of trade cycles.	
Practicum:	Conduct a case study on a country experiencing inflation and identify demand-side factors (e.g., consumer spending, investment) and supply-side factors (e.g., cost of production, supply chain disruptions). Write an assignment presenting different case studies of different phases of the business cycle (e.g., boom, recession, recovery).

III SEMESTER

Public Economics DSC – E3

Program Name	BA in Economics	Semester	Third Semester
Course Title	Public Economics		
Course Code:	ECO C3	No. of Credits	5
Contact hours	65 Hours	Duration of SEA/Exam	3 hours
Formative Assessment Marks	20	Summative Assessment Marks	80

Course Objectives:

- To introduce the fundamentals of public finance and government intervention
- To analyse public revenue and expenditure systems in depth
- To interpret fiscal policy tools and public budgets
- To evaluate deficit sustainability
- To enhance practical understanding through a field-based and data-driven project

Course Learning Outcomes (CLOs):

Students will be able to

- Explain public goods, Market failures and government intervention
- Assess tax structures, incidence and their economic effects
- Analyse public expenditure trends and policy priorities
- Interpret and evaluate public budgets and deficit measures
- Apply theoretical knowledge in real-world fiscal policy contexts

MODULES	DESCRIPTION	65 Hours
Module I	Foundations of Public Economics (13 Hours)	13
	Public Economics: Meaning, Scope and Importance, Public Finance Vs Private Finance Conceptual Distinction; Public good vs private good: Characteristics, examples and implications. Market Failures: causes, types (externalities, public goods, monopolies) Role of Government: Corrective actions – regulation, subsidies, public provision principle of Maximum Social Advantage	11
Practicum	Field Observation: Identify one public and one private good in your locality Group debate: “Should education and healthcare be fully public?” Assignment: Market failure case analysis in the local context	02
Module II	Public Revenue (13 Hours)	13
	Sources of Public Revenue: Tax and non-tax sources. Canons of Taxation (Adam Smith and Modern Canons). Classification of Taxes: Direct vs. Indirect, Progressive vs. Regressive. Proportional, Tax Incidence Impact and Shifting, Taxation and Economic Efficiency Effects on production, Meaning, factors, and consumption and equity, Taxable Capacity estimation. Goods and Services Tax (GST) in India - Objectives, types, advantages & Tax rates	11

Practicum	Mini-Survey: GST compliance and Challenges faced by small traders Comparative analysis of direct vs indirect taxes from the Union Budget Assignment: Study and classify taxes levied by local bodies/municipalities	02
Module III	Public Expenditure (13 Hours)	13
	Meaning and Objectives of Public Expenditure. Classification Revenue vs Capital, Development vs Non-Development, Plan vs non-plan (historical). Canons and Principles of Public Expenditure, Causes for the Growth in Public Expenditure. Theories: Wagner's Law, Peacock-Wiseman Hypothesis. Effects of Public Expenditure on production, distribution, and welfare. Evaluation of Major Welfare Expenditures: Health, Education, Infrastructure	11
Practicum	Analyse trends in expenditure on education and health from the Union/State Budgets Field-based project Assessment of a Government welfare program (Eg, PMAY, MGNREGA, Sthri Shakthi) Assignment: Case study on allocation and efficiency/ inefficiency in public spending	02
Module IV	Public Debt and Management (13 Hours)	13
	Public Debt Definition, classification (internal/external, voluntary, compulsory). Purpose and Growth of Public Debt, Theories of Public Debt, Ricardian, Keynesian, and Post Keynesian, Burden of Debt, Intergenerational equity and sustainability, Debt Redemption Methods, Public Debt Management in India, Challenges and Strategies	11
Practicum:	Create a visual timeline of India's public debt evolution Assignment: Compare India's debt-to-GDP ratio with that of another emerging economy Group discussion: "Should India borrow more for infrastructure spending?"	2
Module V	Public Budget, Fiscal Policy and Deficit Management (13 Hours)	13
Practicum:	Public Budget Concepts, components, and types (Revenue, Capital, Performance, Gender), Budgeting Process and Classification (Economic and Functional). Fiscal Deficit. Revenue Deficit, Primary Deficit Definitions and Calculations Fiscal Policy Objectives and tools (automatic stabilizers, discretionary tools). Deficit Financing: Meaning, methods, implications, Budget Transparency and Accountability. FRBM Act and Fiscal Consolidation	11
	Latest Union Budget and State Budget Analysis Workshop: Interpreting budget highlights and deficit measures Budget Stimulation Roleplay: Prepare and present a mini-budget in class Assignment: Analyse fiscal policy during a crisis (e.g. COVID-19 response budget) and the post-COVID period.	02

Economics of GST

Elective-3.1

Program Name	BA in Economics	Semester	Third Semester
Course Title	Economics of GST		
Course Code:	Elective-3.1	No. of Credits	2
Contact hours	30	Duration of SEA/Exam	1.5 Hours
Formative Assessment Marks	10	Summative Assessment Marks	40

Course Objectives (COBs)

By the end of this course, students will be able to:

- Understand the evolution and structure of indirect taxation in India, with a specific focus on the shift to the Goods and Services Tax (GST) regime.
- Explore the legal, structural, and administrative aspects of GST, including registration, levy, valuation, and tax credit mechanisms.
- Analyse the economic impact of GST on businesses, consumers, and various sectors of the economy.
- Apply concepts and techniques for calculating GST and Input Tax Credit, including understanding the place, time, and value of supply.
- Develop a critical perspective on tax reforms, policy implementation, and federal cooperation through the GST framework.

Course Outcomes (COs)

After successful completion of the course, students will be able to:

- **CO1:** Describe the pre-GST indirect tax system and explain the rationale behind India's shift to GST.
- **CO2:** Explain the structure and components of the dual GST model (CGST, SGST, IGST, UTGST) and the constitutional framework.
- **CO3:** Identify and interpret key provisions of GST law, including taxable events, exemptions, and classification of supplies.
- **CO4:** Evaluate the role of the GST Council and administrative bodies in the implementation and governance of GST.
- **CO5:** Calculate GST liability, valuation of supply, and eligible Input Tax Credit through practical problems and illustrations.
- **CO6:** Analyse the broader economic implications of GST on production, distribution, and consumption patterns in the Indian economy.

Modules	Contents	30 Hrs
Module-1	Introduction to Economics of GST	10
	Overview of Indirect Taxes: Understanding the landscape of indirect taxation before the implementation of GST. GST: Definition, objectives, and the rationale behind introducing GST, Types of GST, GST Structure: Understanding the dual GST model in India, Constitutional Amendments: Key amendments related to GST	08
Practicum	Group Discussions on Indirect Taxes defects before GST Assignment on Types of Indirect Taxes before GST and After the Introduction of GST Group discussion: “Pros and cons of GST”	02
Module 2	GST Law and Its Implementation	10
	GST Council: Its role and functions., Registration under GST: Understanding the registration process and its implications, GST Rates and Exemptions, determining the time, place and value of Supply for GST calculation. Input Tax Credit (ITC), Eligibility for ITC: Conditions and restrictions on claiming ITC, Calculation of ITC, Supplier's declarations, GST Returns and the filing process, GST Payments	08
Practicum	Roleplay: Classroom simulation of a GST Council meeting to determine tax rates Numerical problems on: GST and ITC calculations, Valuation of supply and tax liability, Adjustment of ITC (CGST, SGST, IGST)	02
Module 3	Impact of GST	10
	Economic Effects: Impact of GST on various sectors (agriculture, manufacturing, services), Impact on Consumers: Changes in prices and consumer behaviour, Impact on Businesses: Changes in compliance requirements, costs, and competitiveness, Revenue Implications: Impact on government revenue and fiscal policy	08
Practicum	Sectoral Case Study Analysis: Divide students into small groups. Each group selects one sector (Agriculture, Manufacturing, Services) and prepares a case study exploring how GST has affected input costs, tax compliance, logistics, and pricing. A group presentation or report highlighting, Pre-GST tax structure vs the post-GST impact, Benefits and challenges faced in the sector, Policy suggestions, if any	02

Program Name	BA in Economics	Semester	Third Semester
Course Title	Artificial intelligence and machine learning for Economics		
Course Code:	Elective-3.2	No. of Credits	2
Contact hours	30	Duration of SEA/Exam	1.5 hours
Formative Assessment: Marks	10	Summative Assessment Marks	40

Course Objectives:

- Understand the fundamental concepts and evolution of Artificial Intelligence (AI) and Machine Learning (ML), and their significance in economic decision-making.
- Explore the applications of AI and ML in economics, such as economic forecasting, policy analysis, and market Behaviour modelling.
- Gain working knowledge of machine learning models and evaluation techniques with simplified examples relevant to economic datasets.
- Critically examine the ethical, legal, and policy issues associated with the use of AI and ML in the economic domain.
- Develop a responsible and inclusive perspective on how technology impacts economic systems, especially in the Indian context.

Course Outcomes

After successful completion of the course, students will be able to:

- **CO1:** Describe the evolution, scope, and terminology of AI and ML, particularly in relation to economics.
- **CO2:** Explain how AI and ML models are used in various economic sectors including public policy, markets, and development planning.
- **CO3:** Apply core machine learning concepts such as regression, classification, and dimensionality reduction to simplified economic problems.
- **CO4:** Interpret model performance using basic evaluation metrics like confusion matrix, precision, recall, and ROC curves.
- **CO5:** Analyze ethical challenges such as data privacy, algorithmic bias, and transparency in AI systems used for economic decision-making.
- **CO6:** Assess policy frameworks and recommend strategies for responsible and inclusive use of AI in economic governance.

Artificial Intelligence and Machine Learning for Economics

Elective -3.2

MODULES	DESCRIPTION	30 Hours
Module I	Foundations of Artificial Intelligence and Machine Learning in Economics	10
	Understanding AI and ML- Definitions, core concepts, and goals of AI and ML, Distinction between AI, ML, and Data Science. Meaning: algorithms, models, datasets, predictions, learning types History and Evolution: Milestones in AI and ML development, From expert systems to neural networks: a simplified journey, Timeline of AI/ML adoption in economic research and forecasting	08
Practicum	Debate: "Will AI replace economists?" – explore automation vs human decision-making in economic planning. Case Discussion: Analyse a real-world example of ML being used in economic forecasting (e.g., predicting GDP, inflation, employment). Mini-Research Task: Students select a subfield (e.g., agriculture, labour, finance) and report on how AI/ML is transforming decision-making. Classroom Activity: AI in the news – students bring current examples from newspapers or policy reports and explain the economic relevance.	02
Module II	Economic Applications of AI and ML	10
	Role of AI/ML in economic modelling, Predictive Modelling in Economics, building models for forecasting inflation, unemployment, market analysis-demand estimation, policy impact simulations. AI in Behavioural economics, development economics, labour markets and financial markets, Use of econometric models alongside machine learning techniques Responsible AI for Inclusive Economic Development- Role of AI in reducing or reinforcing inequality, Digital divide and access to AI in rural and underserved communities, balancing innovation with social justice in economic planning	08
Practicum	Mini-project: Predict an economic indicator using real-world data Mock Policy Drafting: In teams, students draft a mini policy brief for “Responsible AI in Indian Economic Policy”. Case study review: Analyse a published study using AI in economics Presentation on AI/ML implementation in public policy or markets	02
Module III	Ethical, Legal, and Policy Dimensions of AI and ML in Economics	10

	Data Privacy and Ownership- Concepts of data privacy, consent, and protection in economic datasets, Issues of surveillance, data monopolies, and misuse of economic data. Algorithmic Bias and Fairness- Understanding bias in training data and model outcomes, Economic implications of biased algorithms in credit scoring, hiring, pricing, etc., Strategies to reduce bias and ensure transparency in economic modelling Regulatory and Legal Frameworks, AI governance policies in India and globally, NITI Aayog's approach to Responsible AI, Global efforts (OECD, UNESCO, EU) for AI ethics and regulations	08
--	--	----

Practicum	Case Analysis: Review an example of algorithmic bias in economic services (e.g., loan rejections, job ads) and suggest mitigation strategies Debate: "Should AI-driven decisions be audited and explained to the public?" Roleplay: Simulate a public hearing with stakeholders (govt, tech firms, civil society) on the ethical use of AI in welfare schemes. Reflection Essay: Students write a short essay on: "How can AI help — or harm — inclusive economic growth in India	02
------------------	---	----

Development Economics IV Semester

Program Name	BA in Economics	Semester	Fourth Semester
Course Title	Development Economics		
Course Code:	ECO C4	No. of Credits	5
Contact hours	65 Hours	Duration of SEA/Exam	3 Hours
Formative Assessment Marks	20	Summative Assessment Marks	80

Course Objectives:

- To introduce students to the foundational concepts and distinctions between economic growth and economic development.
- To examine key development indicators and measurement tools used in assessing development progress.
- To familiarise students with classical, general, and partial theories of economic development
- To enable critical analysis of development patterns in developed and developing countries.
- To explore sectoral contributions (agriculture and industry) to the development process
- To build understanding of inclusive and sustainable development frameworks, including global goals (MDGS and SDGs)
- To develop students' ability to apply theoretical knowledge through practical assignments, data analysis, and real-world case studies.

Course Outcomes (COs):

After the successful completion of the course, the student will be able to:

- **CO1:** Understand the basic concepts and measurements of Development.
- **CO2:** Learn some classical and partial theories of Development economics and identify the difference.
- **CO3:** Analyse differences between developed and developing economies through empirical data
- **CO4:** Critically evaluate sectoral contributions and strategies for sustainable and inclusive Development
- **CO5:** Apply learned concepts through hands-on activities. data analysis, and policy review relevant to India and other economies

MODULES	DESCRIPTION	65 Hrs
Module 1	Introduction to Economic Development (13 Hours)	13
	Concept and Definitions of Development and Growth. Economic Growth vs. Economic Development, Indicators of Development. GDP per capita, Human Development Index (HDI), Physical Quality of Life Index (PQLI), Happiness Index Poverty and Inequality: Concepts and Measures: Gini Coefficient. Human Poverty Index (HPI). Multidimensional Poverty Index (MPI)	11

Practicum:	Comparative analysis project using HDI and MPI data of selected countries Field survey or case study on local development indicators Create visual infographics of key development indices using Excel/Google Sheets	2
Module 2	General Theories of Economic Growth and Development (13 Hours)	13
	Adam Smith's Theory, David Ricardo's Theory, TR Malthus' Theory, Karl Marx s Theory: Schumpeter's Theory and Rostow's Growth Theory - Harrod-Domar Model.	11
Practicum:	Assignment comparing classical and modern development theories Group presentations on the relevance of each theory to contemporary India Debate "India in 2047 - A Developed Nation?"	2
Module 3	Partial Theories and Strategies of Economic Development (13 Hours)	13
	Lewis Dual Sector Model, Rodan's Big Push Theory, Leibenstein's Critical Minimum Effort Thesis, balanced vs. Unbalanced Growth, Factors in the Development Process Capital Formation, Capital-Output Ratio, Technological Change	11
Practicum:	Simulation game: Balanced vs. Unbalanced Growth Strategy Assignment India's push for capital accumulation & productivity growth Poster/infographic: Capital-output ratio and its implications on policy	2
Module 4	Sectoral View of Development (13 Hours)	13
	Agricultural Sector and Development- Role of Agriculture in Economic Development, Agricultural Production and Agricultural Productivity, Sustainable Agriculture. Industrial Sector and Development- Role of Industry in Economic Development, Industrialisation in Developing Economies: Patterns and Challenges, Appropriate Technology and Employment Generation- Micro, Small and Medium Enterprises (SMEs) Role, Constraints, and Policies, Startup. Entrepreneurial Economics

Elective 4.1

Program Name	BA in Economics	Semester	Fourth Semester
Course Title	Entrepreneurial Economics		
Course Code:	Elective-4.1	No. of Credits	2
Contact hours	30	Duration of SEA/Exam	1.5 hours
Formative Assessment Marks	10	Summative Assessment Marks	40

Course Objectives:

- To introduce the fundamental concepts of entrepreneurship and the entrepreneurial mindset.
- To help students understand the role of entrepreneurship in economic development.
- To guide students through the process of identifying business opportunities and launching ventures.
- To provide insights into innovation, creativity, and legal protection of business ideas.
- To familiarize students with entrepreneurial support systems, funding options, and government schemes.

Course Outcomes

After successful completion of the course, students will be able to:

- **CO1:** Explain the concepts, types, and importance of entrepreneurship in economic growth.
- **CO2:** Identify viable business opportunities and design a basic business plan.
- **CO3:** Apply creative thinking and innovation tools in developing entrepreneurial ideas.
- **CO4:** Evaluate available support systems and funding mechanisms for starting a venture.
- **CO5:** Demonstrate entrepreneurial thinking through field-based practicums and project work.

MODULES	DESCRIPTION	30 Hours
Module I	Entrepreneur and the Economy	10
	Entrepreneurs: meaning, definitions, types and characteristics, functions; Difference between entrepreneur, manager, and intrapreneur; Role of entrepreneurship in economic development; Factors influencing entrepreneurship: psychological, social, economic, and environmental; Emerging trends: social, health, tourism, and women entrepreneurship; Barriers to entrepreneurship	08
Practicum	Group Discussion: “Entrepreneurs vs Managers” Interview: Talk to a local entrepreneur and prepare a short report on their journey Poster Presentation: Barriers faced by women or rural entrepreneurs	02
Module II	Launching Entrepreneurial Ventures	10

	Idea generation: sources, screening, and assessing opportunities, Business plan: structure and content, steps in setting up a business, Market survey, feasibility study, opportunity mapping, Role of innovation and creativity in entrepreneurship, Types and sources of innovation, Intellectual property: branding, trademarks, copyrights, patents, registered designs	08
Practicum	Business Idea Pitch: Students present a new venture idea in class Fieldwork: Conduct a small market survey for a local product/service Simulation: Create a sample business plan for a startup Workshop: Introduction to Intellectual Property Rights with case examples	02
Module III	Entrepreneurial Ecosystem and Support Systems	10
	Entrepreneurial assistance and support institutions, Industrial Parks and SEZs – meaning, features, and examples, Financial assistance: licensing, clearances, tax concessions, Debt vs equity financing; venture capital, angel investors, Government initiatives: Start-up India, MUDRA, Make in India, EDPs, Entrepreneurship Development Programmes – objectives, phases, and inputs	08
Practicum	Case Study: Analyse a government-supported startup (e.g., under Startup India) Roleplay: Simulate an EDP training session in class Report Writing: Industrial visit or virtual tour of an incubation centre Quiz: Government schemes for entrepreneurs	02

Economics of Start-Up Elective 4.2

Program Name	BA in Economics	Semester	Fourth Semester
Course Title	Economics of Start-Up		
Course Code:	Elective-4.2	No. of Credits	2
Contact hours	30	Duration of SEA/Exam	1.5 hours
Formative Assessment Marks	10	Summative Assessment Marks	40

Course Objectives:

- To introduce students to the economic foundations and dynamics of start-ups and entrepreneurship.
- To explore the start-up ecosystem, including funding mechanisms, institutional support, and market positioning.
- To equip students with the analytical and practical tools to evaluate financial, legal, and strategic aspects of launching and managing a start-up.
- To develop entrepreneurial mindsets and innovation-oriented thinking among students.
- To encourage students to apply economic principles in real-world start-up planning and feasibility assessment.

Course Outcomes:

After completing this course, students will be able to:

- **CO1:** Understand the evolution, structure, and economic significance of start-ups.
- **CO2:** Analyze financial requirements, funding options, and regulatory procedures relevant to start-ups.
- **CO3:** Apply tools such as feasibility analysis and process mapping in business planning.
- **CO4:** Evaluate strategies for scaling, managing growth, and addressing failure in entrepreneurial ventures.
- **CO5:** Design and present a viable business model based on ideation and innovation principles.
-

MODULES	DESCRIPTION	30 Hours
Module I	Foundations of the Start-up Ecosystem	10
	Understanding business start-ups and the rise of the start-up economy, Ideation and venture choices, Key pillars of start-up development and the start-up equation, Entrepreneurial ecosystem and institutions, Role of government initiatives: Start-up India, incubation centres, support hubs. Entrepreneurship trends in India and Bengaluru	08
Practicum	Case Study: Select a successful Indian start-up and map its growth using the start-up equation Idea Clustering: Group ideation workshop with feedback on viability and innovation Debate: “Do start-ups truly drive inclusive growth in India?”	02

Module II	Start-up Finance and Legal Framework	10
	Resource and capital needs for start-ups, Financial assumptions and process mapping, Positioning in the value chain and risk-reduction strategies, Funding types: equity, debt, bootstrapping, crowdfunding, alliances, Legal procedures: registration, taxation, compliance, approvals, Financial feasibility and funding for high-tech ventures	08
Practicum	Simulated Budgeting: Prepare a start-up's financial plan with capital assumptions Roleplay: Founders pitch to a mock investment panel (venture capitalist/angel investor) Mini Research Task: Compare funding models used by Indian vs global start-ups	02
Module III	Start-up Growth, Exit, and Strategy	10
	Stages of venture growth and life cycles, Scaling up: industry positioning and competitive edge, Venture life patterns and adaptation to change, Exit strategies: selling, merging, shutting down, Leadership succession planning, Dealing with business failure and bankruptcy	08
Practicum	Workshop: Build a growth and exit strategy for a hypothetical business Panel Discussion: Invite local entrepreneurs to discuss success, failure, and pivots Reflective Essay: Write on "What I learned from a failed start-up" using real-life examples	02

BA–ECONOMICS Vth SEMESTER

Program Name	BA in Economics	Semester	Fifth Semester
Course Title	Public Economics		
Course Code:	ECO C9	No. of Credits	4
Contact hours	60 Hours	Duration of SEA/Exam	2.30 hours
Formative Assessment Marks	40	Summative Assessment Marks	60

Course Outcomes (COs): After the successful completion of the course, the student will be able to:

CO1. Understand introductory Public Finance concepts.

CO2. Study the causes of market failure and corrective actions

CO3. Understand the impact, incidence and shifting of tax

CO4. Study the Economic Effects of tax on production, distribution and other effects

CO5. Enable the students to know the Principles and Effects of Public Expenditure

CO6. Understand the Economic and functional classification of the budget; Balanced and Unbalanced budget

CO7. Understand the Burden of Public debt and know the Classical/ Ricardian views, Keynesian and post-Keynesian views

CO8. To acquaint with the advantages and disadvantages of Deficit Financing,

MODULES	DESCRIPTION	60 Hours
Module I	Introduction to Public Economics	15
	Public Economics: Meaning, definitions, Scope and Significance, Public Finance and Private Finance: Meaning, and Distinction; Public good and private good: Meaning, Characteristics, and Distinction, Principle of Maximum Social Advantage, Market Failures: Meaning, causes-role of externalities; Market failure and role of government; Corrective actions.	
Practicum	Group Discussions on Public Finance and private finance; public good and private good Assignment on Market failure and government intervention	
Module II	Public Revenue and Public Expenditure	18
	Meaning and sources of revenue; Taxation –Cannons of taxation, Characteristics of a sound tax system, Impact, Incidence- Division of Tax burden, Shifting of tax, Economic Effects of tax on production, distribution and other effects, Progressive and Regressive, Proportional Tax, Direct and Indirect Taxes –Merits and Demerits, Taxable Capacity: Meaning and determinants. Public Expenditure; Meaning, classification, principles, Types & Cannons, Reasons for the growth of public	

	expenditure, Wagner's law of increasing state activities, Peacock-Wiseman hypotheses, Effects of public expenditure: Production, Distribution & Other effects	
Practicum	Mini-project/study to ascertain the impact of GST on retailers/wholesalers in your vicinity A case study on the taxable capacity of the different sections of society in the vicinity Assignment on Effects of public expenditure: Production, Distribution & Other Effects	
Module III	Public Debt	12
	Public Debt: Meaning, Purpose, Types & Effects; Sources of Public Borrowing; Burden of Public Debt -Classical/ Ricardian views, Keynesian and post-Keynesian views; Intergenerational equity of public debt; Causes of the Rise in Public Debt; Methods of debt redemption; Debt management.	
Practicum	Studying the burden of public debt through a project/ case study Assignment on Debt Management	
Module IV	Public Budget, Fiscal Policy and Fiscal Deficit	15
	Budget: Meaning, process & Types of budget, Economic and functional classification of the budget; Balanced and unbalanced budget, Types of Budget Deficits; Fiscal Policy: Meaning, objectives & Tools; Fiscal deficit: Meaning, Computation, Deficit Financing: Meaning, Advantages and Disadvantages	
Practicum:	Calculation of various types of budget deficit using the budget data Group discussion on the advantages and disadvantages of deficit financing

BA–ECONOMICS Vth SEMESTER

Program Name	BA in Economics	Semester	Fifth Semester
Course Title	Development Economics		
Course Code:	ECO C10	No. of Credits	4
Contact hours	60 Hours	Duration of SEA/Exam	2.30 Hours
Formative Assessment Marks	40	Summative Assessment Marks	60

Course Outcomes (COs): After the successful completion of the course, the student will be able to:

- CO1. Understand the basic concepts and measurements of Development.
- CO2. Learn some classical and partial theories of Development economics and identify the difference.
- CO3. Identify the difference between Developed and Developing Countries.
- CO4. Analyse and tackle the Development issues effectively.

MODULES	DESCRIPTION	60 Hrs
Module 1	Introduction to Economic Development	14
	Concept - Definitions - Distinction between Economic Growth and Development - Indicators of Growth and Development, Measures of Economic Development: Gross National Product (GNP) - Physical Quality of Life Index (PQLI), Human Development Index (HDI), Happiness Index, Inequality and Poverty: Meaning, causes, indicators - Gini Coefficient Index, Human Poverty Index (HPI).	
Practicum:	Assignment on various indicators of growth and development Group discussions about the characteristic features of different countries and their development levels	
Module 2	General Theories of Economic Growth and Development	16
	Adam Smith's Theory, David Ricardo's Theory, T.R. Malthus' Theory, Karl Marx's Theory, Schumpeter's Theory and Rostow's Growth Theory - Harrod-Domar Model.	
Practicum:	Assignment on different theories and their relevance to developing Countries, Debate on present stage of India's growth and estimated stage it may reach by 2047	
Module 3	Partial Theories of Economic Development	16
	Lewis Labour Surplus Model - Rodan's Big Push Theory - Lieberstein's Critical Minimum Effort Approach - Balanced Vs. Unbalanced Growth, Factors in the Development Process Capital Accumulation - Capital-Output Ratio - Technology and Economic Development.	

Practicum: Group Discussion on Balanced and unbalanced growth strategies in Developed and developing countries

Assignment on the Factors in the Development Process Capital Accumulation

Module 4 Sustainable Development

14

Inclusive Development - Millennium Development Goals - Sustainable Development Goals, Programs, Targets and Achievements with reference to India.

Practicum Seminar on MDGs and SDGs and the challenges

BA–ECONOMICS Vth SEMESTER

Program Name	BA in Economics	Semester	Fifth Semester
Course Title	Economics of Human Resource Management		
Course Code:	ECO C11	No. of Credits	4
Contact hours	60 Hours	Duration of SEA/Exam	2.30 Hours
Formative Assessment Marks	40	Summative Assessment Marks	60

Course Outcomes (COs): After the successful completion of the course, the student will be able to:

- CO1. Understand the meaning, nature, scope and value of the contemporary approach to human resource management with reference to Economics.
- CO2. To describe an organisation of a human resource management functionary in an establishment, and to identify attributes of a successful personnel manager.
- CO3. To impart knowledge and techniques in human resource planning, Job-Analysis, and Job-Design.
- CO4. To explain various methods of recruitment, selection, induction and placement.
- CO5. To develop the importance and methods adopted for training and development of employees in two days environment in the workplace.

MODULES	DESCRIPTION	60 Hours
Module I	Introduction to Human Resource Management	15 hrs
	Human Resource Management: Concept, Nature, scope, objectives, importance, functions of Human Resource Management with reference to Economics; Organization of personnel department, Qualities of Personnel Manager, role of Personnel Manager, Status of Personnel Manager; Characteristics of a Human Resource Manager, HRD - Responsibility of managers.	
Practicum	Group Discussions on Human Resource Management as a Profession. Assignment on Qualities of Personnel Manager	
Module II	Procurement of Human Resources	15 hrs
	Human Resource Planning – Concept and objectives, importance, process, problems and guidelines; Job Design and Analysis: Concept, process, job description and job specification; Recruitment and Selection Meaning and process of recruitment, recruitment policy and organization, sources and techniques of recruitment, meaning and process of selection.	
Practicum	Assignment on recruitment and selection Group discussion on Techniques of Recruitment	
Module III	Training and Job Evaluation	15 hrs

Training: Concept, objectives, importance; identifying training needs. Designing training programmes, methods, techniques of training, evaluating training effectiveness, retraining Concept, process and objectives of job evaluation, advantages and limitations, essentials of successful job evaluation, methods of job evaluation, Wage and Salary Administration. Objectives and principles, essentials of sound wage structure, factors affecting wages, methods of wage payment, and wage policy in India, executive compensation.

Practicum Project on training and job evaluation

Module IV Performance Appraisal 15 hrs

Performance appraisal: Concept, objectives, uses, process, problems, essentials, methods and techniques, appraisal, interview, Transfers, promotions and separations. Purpose of job changes, concept and objectives of transfers. Types of transfer, transfer policy, concept and basis of promotion, promotion policy, demotion, types of separations.

Practicum Seminar on transfers and promotions
Group discussion on Performance appraisal

**BA–ECONOMICS
VIth SEMESTER**

Program Name	BA in Economics Internship	Semester	Sixth Semester
Course Title	Internship		
Course Code:	Skill Enhancement Course	No. of Credits	2
Contact hours		Duration of SEA/Exam	Practical
Formative Assessment Marks	50	Summative Assessment Marks	NA

INTRODUCTION:

Internship [Organizational work] is an integral part of the National Education policy- 2020. Its objective is to equip students with job skills and communication abilities, enabling them to bridge the gap between theoretical knowledge and practical application. The internship program incorporates various interventions that offer students exposure to real-life job experiences and expectations, empowering them with insights into the workings of different industries.

The internship is strategically positioned during the 6th semester of the Bachelors of Arts in Economics program. This timing provides students with a strong foundation in economics, enabling them to apply their knowledge in real-world settings. Additionally, the program caters to the critical need for teaching skills in economics and administration, enhancing the academic qualifications of students. Overall, the internship program aims to prepare students for the job market, thereby bridging the gap between academia and the professional world.

OBJECTIVES:

The objectives of conducting program are:

1. To boost students' employability by imparting soft skills that are essential in everyday life.
2. To enable students discover their professional strengths and weaknesses and align them with the changing economic environment.
3. To provide an opportunity for students to apply theoretical concepts and knowledge in real life situations at the work place.
4. To prepare students to understand organization culture and familiarize them with the organization needs.

5. To enable students to manage resources, meet deadlines, identify and undertake specific goal-oriented tasks.
6. To sharpen domain knowledge and provide core competency skills.

Internship Requirements & General Guidelines:

A. Nature of internship project work:

1. Every Student is required to work in an organization (a firm, self- help groups/cooperatives/farms or any rural economy components) for at least two months as part of Internship.
2. The student shall identify an internship work place.
3. Maximum five students of the same department from a College/University shall work for Internship in the same organization.
4. Internship work may be to carry out Professional work.
5. The internship shall be paid or unpaid.
6. While, working from the organizational premises is encouraged, in certain cases, virtual internship shall be considered.

Duration of Internship:

- 1.The Internship works shall be for a period of TWO months [Sixty Days].
- 2.The internship commences from the first day of the sixth semester.
- 3.Student is expected to carry out his/her Internship works during the first FIVE days of the week, and shall report to the department on a weekly basis.
- 4.The duration of the work shall be specified by the organization at the beginning of the program and the number of hours spent shall be in line with the prevailing rules.

Guide and Mentor:

- 1.An internal mentor shall be assigned by the University/College for the smooth conduct and supervision of the internship program.
- 2.The internal mentor shall provide guidance students in securing internship and to monitor the progress.

Protocol of the Internship work:

- 3.The head of the institution shall issue an internship work authorization letter during the 5th semester to the College or Organization where student is expected to join the internship work.
- 4.Student is expected to take up the preliminary work such as identifying the organization and engaging in securing in an offer from an organization
- 5.During the 5th semester, students who secured an offer must get consent offer signed by the principal/head to carry out internship.
- 6.Student must submit the joining report with the date of joining for internship to the department head through internal mentor.
- 7.In case of professional work, the student is expected to be regular in performing his/her duties/tasks assigned to him/her by the Organization.

Evaluation:

- 1.All the students should obtain a certificate of internship from the workplace. This certificate shall mention the name of the candidate, the organizations name and duration of work. A letter describing the work of the candidate is desirable. The certificate shall be submitted to the department head.
- 2.The performance of a candidate shall be assessed for maximum of 100 marks.
- 3.The assessment methods shall be decided by the Universities based on the existing conventions.
- 4.The assessment method shall consist of an internship report submitted by the students based on the work experience and a viva-voce/presentation.
5. **Viva-voce/Presentation:** There shall be a viva-voce examination will be conducted for by the department where each student is expected to give a presentation and submit necessary documents.
