THE NATIONAL COLLEGE BASAVANAGUDI, BENGALURU- 560 004

AUTONOMOUS NAAC Accredited 'A' Grade

Affiliated to the Bengaluru City University Website: www.ncbgudi.com

Department of Computer Science

1) Report on Soft Skills Training for BCA Students by Magic Bus

Dates: 11th November 2024 to 16th November 2024

Venue:The National College, Basavanagudi

Organized by: Magic Bus Foundation

Target Audience: BCA Students

Training Objectives:

1. Enhance students' communication and public speaking skills.
2. Develop teamwork, leadership, and collaborative abilities.
3. Build problem-solving and decision-making capabilities.
4. Improve self-awareness and emotional intelligence for professional growth.
5. Prepare students for recruitment processes through practical sessions on interviews and group discussions.

Program Structure and Activities:

1. **Day 1: Introduction and Ice-Breaking Activities**
 - Orientation on the importance of soft skills.
 - Interactive games to encourage participation and build rapport.
2. **Day 2: Communication Skills Development**
 - Sessions on verbal and non-verbal communication.
 - Public speaking exercises and feedback sessions.

3. Day 3: Teamwork and Collaboration

- Group tasks and activities to promote teamwork.
- Emphasis on leadership and conflict resolution.

4. Day 4: Problem-Solving and Critical Thinking

- Case studies and real-world problem-solving scenarios.
- Workshops on logical thinking and decision-making.

5. Day 5: Personality Development and Professional Etiquette

- Grooming and workplace etiquette sessions.
- Building self-confidence and positive thinking.

6. Day 6: Mock Interviews and Group Discussions

- Simulated interview rounds with personalized feedback.
- Group discussion practice to enhance articulation and collaboration skills.

Feedback and Outcomes:

- Students reported increased confidence and readiness for professional challenges.
- Many participants appreciated the interactive and hands-on approach of the trainers.
- The mock interview sessions were highlighted as particularly beneficial in preparing for campus placements.

2) Report on IBM Skill Building for BCA Students at The National College,Basavangudi

The Department of Computer Science organized a IBM Skill Building Program for BCA students at The National College, Basavangudi, was a comprehensive program aimed at equipping students with the necessary skills and knowledge to excel in their job search and career development. The training was organized by Department of Computer Science on 6/12/2024, and covered various

aspects of career readiness, including resume building, interview skills, and technical aptitude. 100 students participated in the session.

3) Training on AI and ML for MCA and MSc students

A three-day hands-on training program on AI and ML is currently going on for MCA and M.Sc Computer Science students, focusing on practical learning. On Day 1, students explored AI and ML fundamentals, Python programming, and data preprocessing techniques. Day 2 is covering machine learning models, including regression, classification, and clustering, with hands-on implementation. Day 3 will introduce deep learning using TensorFlow/Keras, followed by real-world project applications. Students are actively participating in coding exercises and interactive discussions. The program is enhancing their technical skills and industry readiness in AI and ML. Overall, the training is progressing successfully, with enthusiastic engagement from participants.

Brief Report on Hands-on Training Program on AI and ML

Program Details

- **Duration:** 3 Days
- **Target Audience:** MCA and M.Sc Students
- **Objective:** To provide practical exposure to Artificial Intelligence (AI) and Machine Learning (ML) concepts, tools, and real-world applications.

Day-wise Summary

Day 1: Introduction to AI & ML

- Overview of AI and ML, their significance, and industry applications.
- Basics of Python programming for AI & ML.
- Hands-on session on data preprocessing and exploratory data analysis (EDA).

Day 2: Machine Learning Techniques

- Supervised and Unsupervised Learning algorithms.
- Implementation of regression, classification, and clustering techniques.
- Model building, evaluation, and optimization using Scikit-learn.

Day 3: Deep Learning & Real-world Applications

- Introduction to Neural Networks and Deep Learning.
- Hands-on implementation using TensorFlow/Keras.
- Project-based learning: Students worked on mini-projects to apply AI/ML techniques to real-world problems.

Outcome & Impact

- Students gained practical skills in AI & ML development.
- Improved understanding of industry-relevant tools and frameworks.
- Participants successfully developed AI models and presented their project outcomes.

The program received positive feedback from students and faculty, highlighting the interactive and practical learning approach.

4) Report on One-Day workshop on GEN AI

Date:26-03-25

Venue:HNHALL

Organized by: National College Basavanagudi, Department of Computer Science

Target Audience: BCA/MCA students

Resource Person: Lakshmi

Introduction

A one-day session on **Jennie AI** was successfully conducted on 26-03-2025 with the objective of introducing students and faculty to the features, capabilities, and applications of Jennie AI – an emerging conversational AI tool. The session aimed to enhance participants' understanding of how AI-based tools can assist in education, content generation, and productivity.

Objectives of the Session

- To introduce the concept of conversational AI and its real-world applications.
- To demonstrate the working and capabilities of Jennie AI.

- To explore the potential of Jennie AI in educational and professional contexts.
- To encourage students to integrate AI tools into their learning practices.

Session Highlights

The session was divided into the following segments:

1. Overview of Conversational AI:

- Introduction to AI, Machine Learning, and Natural Language Processing (NLP).
- Evolution and significance of AI assistants like ChatGPT, Jennie AI, etc.

2. Introduction to Jennie AI:

- Overview of Jennie AI's features and interface.
- Demonstration of text generation, summarization, and interactive Q&A.
- Comparison with other AI tools (e.g., ChatGPT, Google Bard).

3. Live Demonstration:

- Real-time tasks such as content creation, coding help, and educational assistance.
- How Jennie AI can support teaching, learning, and research.

4. Hands-on Session:

- Participants engaged in using Jennie AI for writing, brainstorming, and technical problem-solving.
- Q&A with the resource person.

Outcomes of the Session

- Participants gained a practical understanding of Jennie AI and its potential use cases.
- Increased awareness of AI-driven tools in education and professional work.
- Sparked curiosity and encouraged further exploration of AI technologies among students.

Feedback

The session received highly positive feedback from participants. They appreciated the interactive approach and the relevance of the topic in today's digital era. Many students expressed interest in exploring more AI tools and incorporating them into their academic projects.

Conclusion

The one-day session on Jennie AI was informative, engaging, and well-received. It served as a stepping stone toward integrating AI in day-to-day academic and professional work. The organizers expressed gratitude to the speaker and all participants for making the session a success.

5) Report on Wipro Campus Visit /Industrial Visit

On **31st May 2025**, final year BCA and Bsc Computer Science Students of **The National College, Basavanagudi** visited the **Wipro Kodathi Campus, Bengaluru**, as part of an industrial exposure program **conducted by the Computer Science Department**. The **main objective** of this visit was to *understand network connection systems in a corporate environment, gain insights into project activities, and observe waste recycling and sustainability practices.*

The Wipro team welcomed the students and conducted an informative session, which included a **neatly prepared PowerPoint presentation**. The session began with an explanation of **how network connectivity is managed** within the organization, covering aspects such as *internal and external communication channels, data security, and efficiency measures*.

The **key concept** learned from the visit was the *practical application of networking concepts, corporate project management, and the integration of sustainability in business operations*. Overall, the industrial visit proved to be a **valuable learning experience**, bridging the gap between *theoretical classroom knowledge and practical industry applications*.

6) Internships

“The Department of Computer Science has provided three different internship opportunities.”

1) SN INFO SYSTEMS

2) INTEL UNNATI EDGATE- Intel® Unnati Industrial Training 2025 Problem statements

- 1) Bug Detection and Fixing
- 2) Gen AI Interactive Learning Games
- 3) AI-Powered Personal Tutor: A Scalable, Adaptive Learning System for Enhanced Student Engagement
- 4) Enhancing Customer Experience with AI-Driven Insights
Objective: Create an AI system that leverages real-time video analytics and customer behavior data to personalize in-store experiences.
- 5) Design and Implementation of an Automated Sorting System Using Mechatronics Principles

- 6) **Comic Crafter AI** is a generative AI based comic generator running locally on edge devices that generates a comic style story based on the input prompts given by the user.

3) **ETHNUS Free Youth Skilling Program - STEM and Non STEM Skills 2026**

- **Mode of Training:** Online
- **Duration:** 150 hours (3 months)
- **Courses Offered:**
 - AWS
 - Full Stack Development (MERN, JAVA)
 - Graphic designing
 - Salesforce
 - Digital Marketing
 - Aptitude, Verbal, Reasoning, and Soft Skills

7) Career Guidance on Data Analytics and Gen AI

Title: Career Guidance on *Data Analytics and Gen-AI*

Date: 05 August 2025

Time: 2:00 PM to 4:00 PM

Venue: HN Multimedia Hall

Organized by: IQAC Initiative and Department of Computer Science

Institution: The National College, Basavanagudi, Bengaluru – 560004

Resource Person: Mr. Chandan Chandrakanth

Career Strategist, Imarticus Learning

Alumnus, Swinburne University (Australia)

Event Overview:

The Department of Computer Science, in association with the Internal Quality Assurance Cell (IQAC), organized a **Career Guidance session on Data Analytics and Gen-AI** on **5th August 2025** at the **HN Multimedia Hall**, from **2:00 PM to 4:00 PM**.

The session aimed to **sharpen students' skills** and offer valuable insights into **emerging technologies** such as **Data Analytics** and **Generative Artificial Intelligence (Gen-AI)**. The resource person, **Mr. Chandan Chandrakanth**, brought a wealth of knowledge and practical experience in the domain, making the session highly impactful

Key Highlights:

- Introduction to **Data Analytics** and its real-world applications.
- In-depth discussion on **Generative AI (Gen-AI)** trends and opportunities.
- Career guidance and industry readiness tips.
- Importance of upskilling and future-proofing tech careers.
- **Interactive Q&A session** with students.

- **Mock Test Conducted:**

A test was conducted for the students, designed to simulate real placement assessments. This mock test helped students evaluate their readiness for future career opportunities and boosted their confidence.

Participants:

Around **150 final-year (5th Semester(BCA&BSC)) students** actively participated in the session. The event was well-received and appreciated for its relevance and practical insights.

Outcome:

The event provided students with **clear career direction**, enhanced their **awareness of current industry demands**, and **motivated them to pursue skill development** in trending technologies. The **mock test** added a practical dimension to the session, helping students **self-assess** and prepare better for placement drives.

8) Omnitricks 2025 – Tech Symposium

(Innovate. Incubate. Ignite.)

Date: 27th October, 2025

Time: 8:00 AM – 8:00 PM

Venue: H.N. Multimedia Hall (Inauguration and Validictory), Computer Labsv(events)

Mode of Conduction: Offline

Total Participants: Over 200 students (Hackathon – 120, Ideathon – 50, Webathon – 25, Codethon – 20)

Event Description

The **Department of Computer Science** in association with the **Institution's Innovation Council (IIC)**, *The National College (Autonomous)*, Bengaluru, successfully organized a **State-Level Tech Symposium – “OMNITRICS 2025”** on **27th October 2025**.

The symposium aimed to foster innovation, creativity, and problem-solving among students through four flagship events — **Hackathon, Codethon, Webathon, and Ideathon** — under the theme “*Innovate. Incubate. Ignite.*”

Inaugural Session

The program began with an inaugural ceremony held at **H.N. Multimedia Hall**, graced by faculty members and participants from various institutions across Karnataka.

Prof. Alakananda K P., Convener, IIC and other IIC members from, Department of Computer Science, welcomed the participants and highlighted the significance of platforms like Omnitrics in nurturing young innovators.

The student coordinators – **Ajay Tainwala, Chatur Baradwaj, and Nachiketh K.** – briefed the audience about the schedule and rules for each event.

Event Highlights

➤ **8-Hour Hackathon (10:30 AM – 7:30 PM)**

Held across the **AI, ML, and BCA Labs**, the hackathon served as the main attraction of Omnitrics 2025. Participants worked in teams to design prototypes and develop software solutions addressing real-world problems. The event tested their coding efficiency, teamwork, and innovation under tight deadlines. Teams presented their final prototypes to a judging panel that evaluated them based on creativity, feasibility, and impact.

➤ **Codethon (11:00 AM – 1:00 PM)**

Conducted in the **MSc Lab**, the Codethon challenged participants to solve algorithmic and programming problems within a stipulated time. The event encouraged logical thinking, programming efficiency, and accuracy under pressure.

➤ **Webathon (2:00 PM – 5:00 PM)**

Simultaneously hosted in the **MSc Lab**, the Webathon focused on front-end and full-stack web development. Participants showcased their UI/UX design skills, creativity, and ability to build functional web interfaces within limited time.

➤ Ideathon (2:00 PM – 5:00 PM)

Organized in the **BSc Lab**, the Ideathon encouraged participants to pitch innovative ideas and conceptual solutions to real-world challenges. Teams presented their ideas before faculty evaluators, who assessed them based on originality, feasibility, and social impact.

Objective of the Event

The primary objective of **Omnitrics 2025** was to promote innovation, entrepreneurship, and creative problem-solving among students by providing a common platform to ideate, develop, and implement technology-driven solutions. Each event had a unique focus — the **Hackathon** fostered practical implementation, the **Codethon** strengthened logical coding skills, the **Webathon** enhanced design and development capabilities, and the **Ideathon** inspired creative conceptual thinking.

Valedictory Function & Prize Distribution

The day concluded with a **Valedictory Ceremony** held in the **H.N. Multimedia Hall**, marking the successful completion of *Omnitrics 2025*. The session began with reflections on the day's activities, followed by feedback from participants who shared their learning experiences and appreciation for the opportunity.

Prof. Alakananda addressed the gathering, congratulating all participants for their enthusiasm and innovative spirit. Winners of each category — *Hackathon*, *Codethon*, *Webathon*, and *Ideathon* — were felicitated with certificates and prizes in recognition of their outstanding performance. The ceremony concluded with a formal vote of thanks, extending gratitude to the organizing committee, faculty, and student volunteers for their dedicated efforts in making the symposium a grand success.

Conclusion

- The symposium successfully provided a collaborative platform for young innovators across institutions.
- Students demonstrated exceptional creativity, teamwork, and problem-solving skills.
- The event strengthened the innovation ecosystem within the campus, aligning with the vision of the Institution's Innovation Council (IIC).
- Faculty and student coordinators received positive feedback from participants, encouraging plans to host future editions of Omnitrics on a larger scale.

Faculty Coordinators:

- Prof. Sangeetha B. K. – IIC President
- Prof. Bharatha V. – IIC Coordinator

Student Coordinators:

- Ajay Tainwala

- Chatur Baradwaj
- Nachiketh K.
- Sejal Yadav
