Computer science Department Activity Report

Academic Year: 2025–2026

Department: Computer Science

College: National College, Basavanagudi Bangalore.

Activity Title: Content Design Fundamentals with Generative AI – Coursera & Adobe Digital Academy (Hybrid Mode)

Target Group: IV Semester MSc

Mode: Hybrid (Online + Offline Teaching Sessions)

Objective of the Activity:

To introduce students to the fundamentals of design and enhance their creative thinking by integrating AI-powered design tools like Adobe Express and Firefly. The aim was to blend online certification learning with offline guidance and mentoring, and award participants with offline certificates upon successful completion, thereby enriching both digital and practical skill sets.

Day 1 – 28th August 2025

The session began with an **Introduction to Design Fundamentals** conducted through Coursera. The Coursera team explained the importance of design in creative fields and introduced the students to **Adobe Digital Academy** and the course outline. Topics covered included:

- Introduction to Adobe Express
- Basics of Adobe Firefly and its possibilities
- Adobe Express in action with real-time demonstrations
- Preparing for success with Adobe tools

Students also learned basic design vocabulary (“Learn the Lingo”) and explored initial creative career paths. A practice assignment was given, and all participants actively engaged.

Day 2 – 29th August 2025

The second day focused on **core design principles and layout techniques**. The Coursera instructors guided students through:

- What is design and why it matters?
- Composition principles in graphic design
- Layout techniques and glossary terms
- Key elements of a great layout
- Finding inspiration in design

Interactive discussions, coach dialogues, and hands-on activities helped students understand the **creative process**—from ideation to execution. Students also explored **Generative AI in Adobe Express** for quick design creation.

Day 3 – 30th September 2025

The final day highlighted **practical design projects** and the **art of color and typography**. Sessions included:

- Creating design projects in Adobe Express

- Exploring the phases of the creative process in action
- Brand Builder Challenge (team-based activity)
- Key takeaways and summary of learning

At the end of the workshop, students attempted a graded quiz and assignments, achieving excellent results. The Coursera team awarded **Certificates of Completion** to all participants, recognizing their successful learning journey.

The three-day **Design Fundamentals Workshop (28th – 30th August 2025)** was highly beneficial for final year MSc-Comp.Science students. It enhanced their knowledge of design principles, creative thinking, and practical skills using Adobe tools. The event encouraged students to explore creative careers and apply design fundamentals in real-world projects.

The Department of Computer Science thanks the **Coursera team** for conducting the sessions and providing valuable certifications to the students.
