IQAC with Department of Mathematics held a special lecture on Quantitative Technique

Date: 21/09/2024

Dr. Uma SK, Head of Department of Mathematics from DRHNNCE provided a brief overview of the "CA-V1: Quantitative Techniques" subject on 21st September from 11am to 1pm. She highlighted the importance of mastering key mathematical concepts such as numbers, simplification, HCF, LCM, logarithms, and probability, as these form the foundation for more complex problem-solving. She also stressed the relevance of practical applications like time and work problems, distance calculations, and data interpretation, which are crucial for real-world scenarios.

Dr. Uma further emphasized the significance of financial mathematics, including interest calculations and profit-loss analysis, along with logical reasoning techniques like analogies and diagrammatic reasoning. Additionally, she pointed out the role of effective teaching methods, research skills, and communication strategies in the course, preparing students for both academic success and professional teaching environments.

Her brief served to underline the comprehensive nature of the subject, focusing not only on technical mathematical skills but also on the broader context of pedagogy and effective communication in the field of quantitative techniques.
